

OSCE Simulations for Nurse Practitioners – A Preparatory Course

The course will be offered in a hybrid format, with preparatory material offered on-line prior the September 15, 2018 one day on-site course focused on application of learning and OSCE simulations.

On-Line Course Description

The on-line portion of the course will be open to registered participants on Monday, August 27, 2018. The format will be asynchronous and registrants can work through the three modules at their own pace. **It is highly recommended that participants complete the modules prior to attending the one day on site course.** Content in the one-day course will build upon the on-line learning experience. Participants should expect to spend 2-3 hours per module. The on-line resources will remain available to participants until mid-October 2018.

Module 1 – What to Expect in an OSCE

This module will focus on the describing the OSCE process including structure, environment, expectations of those under examination, evaluation and effective preparation.

Module 2 – Working Your Way through an OSCE

This module will focus on how to perform a focused health history, physical exam, diagnosis and/or communication of a therapeutic plan within a time constraint and the context of an OSCE. Structured approaches to keep you on track in the OSCE and focused on being successful will be reviewed.

Module 3 – Review of Physical Examination and Clinical Guidelines

This module will provide participants to review the techniques and maneuvers for examination of various systems. Links to current clinical practice guidelines that participants should be familiar with will be provided (e.g. antimicrobial guidelines).

September 15, 2018 One Day On-Site Course Outline

<i>Time</i>	<i>Topic</i>	<i>Faculty</i>
0845	Welcome and Introductions
